SUMMARY

CSE student with strong fundamentals in Python, SQL, and data structures. Focused on problem-solving, building real-world projects, and improving coding skills.

EDUCATION

B.Tech in Computer Science And Business Systems

Visvesvaraya Technological University , Belagavi (2023 - 2027)

- 3rd Year
- CGPA : 8.2

Class XII (PUC) : 79.1% | Class X : 84.64%

TECHNICAL SKILLS

- **Languages:** Python, SQL
 - **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
 - **Concepts:** Data Structures, Problem Solving, Machine Learning
 - **Tools:** VS Code, Jupyter Notebook
-

PROJECTS

Aranyani – Ecosystem Collapse Early Warning System

- Built an AI based system to detect early forest degradation using satellite and ecological data
- Applied anomaly detection (Isolation Forest) on 4 years of Sentinel-2 data
- Developed a full-stack dashboard (FastAPI + React + Leaflet) that visualises risk scores derived from fire hotspot and ecological signal fusion

GitHub: <https://github.com/Sami-7777/Aranyani>

Advanced Cyberattack Detection System

- Developed an ML-based threat detection system classifying phishing, malware, and DoS attacks with high precision using Random Forest and XGBoost
- Extracted URL/IP features and engineered risk scores as inputs to Random Forest and XGBoost classifiers
- Developed backend with FastAPI and dashboard using Streamlit

GitHub: <https://github.com/Sami-7777/Cyber-Attack-Detection-System>

CODING PROFILE

- Solved 100+ problems on LeetCode / GFG; strong in Arrays, Two Pointer, and Sliding Window patterns

LeetCode: <https://leetcode.com/u/sami-7/>

GFG: [geeksforgeeks.org/profile/mahmadsami](https://www.geeksforgeeks.org/profile/mahmadsami)

ACHIEVEMENTS

- Selected for Cognizant Hackathon (Round 1)
- Led 3+ technical events
